Instructions

Objective: Individually create a detailed design treatment for an original board game, covering the concept, gameplay mechanics, visual style, target audience, and inclusivity features. This foundational work will lead to further development phases.

1. Work on the below tasks (recommended to do in the order provided). 2, After you have the core concepts/sketches seek external feedback from 3 different people, preferably people from your target audience
2. Once all items are filled out, ensure this worksheet is saved and explore the PDF
3. Upload the PDF to a branch called `DesignTreatment` on GitHub
4. Create a pull request to main, and complete the merge
5. Upload the same PDF to Canvas

Section #1: (2 pts.) Crafting The Game Treatment

Progress: 100%

Task #1 (0.29 pts.) - Possible Title(s) of the Game

Progress: 100%

Details:

- Propose fitting title(s) reflecting the game's essence
- Explanation of title(s) choices

Your Response:

Working Title: Gamball

This title perfectly combines the main concepts of the game into a nice pun that rolls off the tongue and does it's job in explaining what to expect from the game while also being fun and easy to say and remember. "Gamble" and "Ball" come together to form "Gamball", a nice short and sweet title that does what it needs to do.

Task #2 (0.29 pts.) - Game Setting

Progress: 100%

Details:

- Thoroughly describe the setting

Your Response:

The game takes place in a futuristic casino where players can compete with others to win big. Players can now take advantage of the latest technology to manipulate the game in their favor or out of their opponent's. However, it's still gambling so there's no telling what might happen, a player may end up sabotaging themselves instead of their opponent. Much of entertainment has been made to be casinos, so for better or for worse everyone must play at a casino. Gambling has become a competitive sport and now it's pretty much all there is.

Task #3 (0.29 pts.) - Game Characters

Progress: 100%

Details:

- Thoroughly describe the characters

Your Response:

1. Player - The player has one goal: to play and win big. They are an up and coming gambler who is determined to defeat the Master of the Casino. They've been on a hot streak keeping up with the master and now it's the closest they've ever been to taking the title
2. Opponent - The Opponent is known as the master of the casino, and have never seen loss. They intend to keep this streak going and become the richest person in the world.

Saved: 3/8/2026 9:31:58 PM

Task #4 (0.29 pts.) - Game Theme

Progress: 100%

Details:

- Thoroughly describe the theme

Your Response:

The theme of the game is GAMBLING. Everything is a gamble with a sprinkle of skill and strategy. Players will experience the thrill of gambling in a much more competitive environment where every move is a gamble. Everything revolves around gambling and everything can be gambled, it's the name of the game.

Saved: 3/2/2026 10:07:20 PM

Task #5 (0.29 pts.) - Game Story

Progress: 100%

Details:

- Thoroughly describe the story

Your Response:

In a world where gambling has pretty much taken over all entertainment in the world, there is one who has proven to be the best among the people, known as the Master of the Casino. They have had a long reign over the casino and many have tried to top them to no avail. However there is one person who has been on the come up who may finally threaten the master's reign. The story begins as these two juggernauts come face to face in a climactic match to find out who's the true Master of the Casino.

Task #6 (0.29 pts.) - Objectives and Conflicts

Progress: 100%

Details:

- Describe the goals and challenges within the game

Your Response:

The Objective of the game is to win as many points as possible while trying to thwart the efforts of your opponent. The challenges rise in the unpredictability of the game and trying to make the most of it while also maintaining an advantage. Since anyone may end up hurting themselves it may be better to not act. It's also tough to anticipate what the opponent may do.

Task #7 (0.29 pts.) - Game Mechanics

Progress: 100%

Details:

- List each mechanic with supporting details to clearly portray the mechanic

Your Response:

Drop the balls: The initial base mechanic is to drop balls into a machine that will go into holes to score points... or lose points. The player can choose how many balls they would like to drop onto the board, they could choose up to 3 balls and can even choose to drop none.

Power ups: After scoring a certain amount of points, a player may pull a random power up. However this powerup may not always be beneficial to the user and may end up helping the opponent instead. The player will get to choose whether or not they would like to get a powerup and will have to use whatever they pull. The powerups can only be used on the opponent (e.g. If a player pulls a x2, it must be given to the opponent)

- Block: There will be specific blocks for specific colors, so you can't score in a specific hole (this includes the negative points as well)
- x2 Points: There will be specific ones for specific colors, so you'll gain or lose double the amount of points during your turn.
- Bad Ball: You can add another ball to the set of balls, but it will perform the opposite effect of whatever it lands on. (e. g. if a bad ball lands in +50, then the player who dropped the ball would LOSE 50 points instead of gaining 50 points)
- Great Ball: Adds another ball to the set that doubles the amount of points received wherever the ball lands, including the negative points.

Fever: Toward the end of the game, all points earned and lost will be doubled to up the stakes as the game comes to an end. This may also allow for some otherwise impossible comebacks that make the game just a bit more intense.

Section #2: (1 pt.) Target Audience Analysis

Progress: 100%

Task #1 (1 pt.) - Identify and analyze the game's target audience

Progress: 100%

Details:

- Clearly identify the target audience
- Include analysis of demographics, interests, and gaming habits
- Justification of appeal to target audience

Your Response:

The target demographic of this game would be teenagers to young adults. The game is meant to be quite intense so it would appeal to a much more competitive audience of gamers. Adults already know the appeal of gambling and may be drawn to a game like this. Teenagers may get to experience the good and bad of gambling as a learning experience and just to feel what it's like to gamble without the dangers of actually gambling.

Section #3: (1 pt.) Accessibility And Inclusivity Strategies

Progress: 100%

Task #1 (1 pt.) - Outline strategies to make your game accessible and inclusive

Progress: 100%

Details:

- Include considerations for diverse abilities
- Outline inclusivity strategies for a wide audience
- Discuss implementation of noted inclusivity strategies without compromising gameplay

Your Response:

In order to accomodate for any colorblind individuals, each color will also have it's own symbol along with how many points each color corresponds to. The game is very simple and easy to understand so not many people should have much trouble playing it. There's nothing that requires any extreme effort and the game doesn't have to be

very fast paced. People from all backgrounds will be able to easily get through and enjoy the game. Everything will be made to be understood by anyone regardless of language.

Section #4: (2 pts.) Pitch Preparation

Progress: 100%

Task #1 (2 pts.) - Pitch

Progress: 100%

Details:

- Summarize concept and theme
- Compellingly highlight target audience and unique selling points
- Emphasize how the game stands out in the current market

Your Response:

The game is a hype and exciting experience that anyone 12 and up, who would be interested in a fun competitive game to play against their friends and family, can enjoy. It stands out as a game where every choice matters and could make or break the game for the player. Dropping balls, power ups, and fever are the mechanics the player must master in order to maximize their points. One wrong move could cost the win, but it's also possible for unlikely comebacks thanks to the fever mechanic to make things a little unfair in a fair way. The game can also be played more casually, but the real fun happens in competitive play.

Section #5: (2 pts.) Visualizing The Game Concept

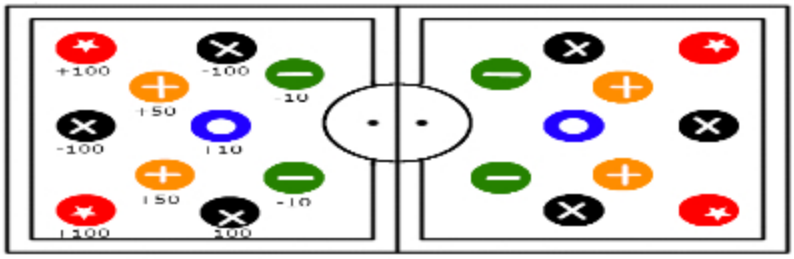
Progress: 100%

Task #1 (2 pts.) - Sketches/Storyboard

Progress: 100%

Details:

- Provide at least two sketches
- Sketches should accurately represent the game's concept and theme
- Sketches/storyboards should be coherent with game's style and theme



Concept of what the board might look like for the game. NOT FINAL and things will likely change in the actual design

Concept of what the powerups should look like. The other colors will have designs similar to that of red.

Saved: 3/7/2026 11:37:05 PM

Section #6: (2 pts.) External Feedback

Progress: 100%

Task #1 (0.67 pts.) - Feedback 1

Progress: 100%

Details:

- Note the person's name and relation to you
- Summarize feedback focusing on concept, mechanics, and style
- Reflect on how the feedback will be used to refine the design

Your Response:

Name: Justin Relation: Friend

Feedback: Likes the concept of the game but feels some of the mechanics are still too RNG heavy. Add more mechanics to the game to make it more skill based.

As a response to this feedback, I'll think about more mechanics that I might be able to add in order to make the game more skill-based. I'll also think about more powerups I could add and how that might change up the gameplay.

Saved: 3/8/2026 10:58:45 PM

Task #2 (0.67 pts.) - Feedback 2

Progress: 100%

Details:

- Note the person's name and relation to you
- Summarize feedback focusing on concept, mechanics, and style
- Reflect on how the feedback will be used to refine the design

Your Response:

Name: Longa Relation: Friend

Feedback: The game seems good, easy to pick up and play. Maybe add more mechanics, abilities, and more gamemodes. Otherwise, nothing else to say.

As a response to this feedback, I'd consider more things I can add to the game that will work with the flow of the game. I'd think about more mechanics, powerups, and experiment with what other gamemodes could possibly be added to the game.

Saved: 3/8/2026 10:59:19 PM

Task #3 (0.67 pts.) - Feedback 3

Progress: 100%

Details:

- Note the person's name and relation to you
- Summarize feedback focusing on concept, mechanics, and style
- Reflect on how the feedback will be used to refine the design

Your Response:

Name: Jonathan Relation: Friend

Feedback: The way powerups work is a little weird. Possibly rename the powerups to something more fitting. The colorblind symbols are a nice feature.

As a response to this feedback, I may rethink how the powerups works and rework the system. Make it more clear what the powerups are used how they're beneficial.
